Education

Taizhou University	Zhejiang, China
B. Eng. in Computer Science and Technology	09/2022 – 06/2026
GPA: 86.1 / 100, 3.61 / 5.0 (Chinese Grading System) Rank: 5 / 137 Total Credits Earned: 184.5 credits	
Hangzhou Dianzi University	Zhejiang, China
Exchange Program (2 Semester)	09/2023 – 06/2024
Wenzhou No.2 Foreign Language School	Zhejiang, China
High School	09/2019 – 06/2022
Wenzhou No.17 Middle School	Zhejiang, China
Junior High School	09/2016 – 06/2019
Wenzhou ShuiXin Primary School	Zhejiang, China
Primary School	09/2010 – 07/2016

Research Experiences

National College Student Innovation and Entrepreneurship Project – Outdoor Smart Helmet Based on Huawei Cloud IoT Platform	
<i>Ministry of Education (Higher Education Department)</i>	05/2025 – 04/2026
Intelligent Financial Decision Support System Based on Tonghuashun HiThink LLM	
<i>IoT Lab, Taizhou University</i>	07/2025 – 11/2025
2025 National Education Technology Application Innovation Competition (National Third Prize) 2025 Zhejiang Service Outsourcing Competition (Provincial Third Prize)	
Deep-learning Project on PM 2.5 Concentration Prediction	

IoT Lab, Taizhou University

04/2025 – 05/2025

Pet Cloud Care System Based on Huawei Cloud IoT Platform

IoT Lab, Taizhou University

02/2023 – 08/2023

Working Experience and Internship

China Telecom Taizhou Branch

Zhejiang, China

Java Backend Development Intern

07/2025 – 12/2025

- **Requirement & System Design:** Conducted requirement analysis with Taizhou Shipping Company; designed flight status management module.
- **Embedded & Voice System:** Developed backend and voice module for flight announcement system using ESP32 for automatic status-triggered alerts.
- **Backend Development:** Built RESTful APIs with Java/Spring Boot for flight query, data sync, and status push.
- **Frontend Integration:** Used Vue 3 to implement flight list display, status management, and real-time updates.
- **Project Management:** Led portal system development; managed scheduling, task allocation, and backend architecture (user center, notifications, content management).
- **Database & DevOps:** Designed MySQL databases (schema, indexing, optimization); handled Linux deployment, logging, and production maintenance.
- **Data Annotation:** Performed data cleaning and labeling for rural house numbering project to support digital governance.

Awards

Internet of Things (IoT) Design Competition

05/2025

- Second Prize, Taizhou University

E-Commerce Competition

04/2025

- First Prize, Taizhou University

National Undergraduate Internet of Things (IoT) Design Contest

08/2023

(Huawei Cup)

- National Second Prize
- First Prize in East China Division

Skills

Programming: C, C++, Java, Python

Tools & Frameworks: Linux, MySQL, Docker, Git, Embedded Systems (ESP32), Vue 3

Theoretical Foundations: Algorithm Complexity, Mathematical Logic, Formal Methods

Languages: Chinese (Native), English (B2), German (A1)
